The Bolderous Atlantic
Is a terror to timid voyagers, scarcely less on account of the perils of the deep than the almost certain loss of the vessel. The best curative of mal de mer is Hostetter's Stomach Bitters, which settles the stomach at once and prevents its disturbance to all travelers and tourists, whether by sea or land, it presents a happy medium between the nauseous or ineffectual resources of the medicine chest and the protracted and distressing remedy from an unmedicated alcoholic stimulant, no matter how pure. The jarring of a railroad car often produces stomachic disorders, especially the indigestion by the rolling of a ship. For this the bitters is a prompt and certain remedy. The use of a brackish water, particularly on steamship voyages, the topics, inevitably breeds disorders of the stomach and bowels. Hostetter's Stomach Bitters mixed with pure water nullifies its impurities. Similarly it counteracts malaria and other malarial influences in climate or atmosphere, as well as the effects of exposure and fatigue. Use it for kidney complaints, rheumatism and debility.

THE Eloquent Silver Champion in This City.
Senator William M. Teller, the eloquent silver champion of the continental states, arrived in the city yesterday morning. He had been on a western tour, having made his way to the coast through New Mexico and Arizona.
Mr. Teller is confident that the world will ultimately be brought about to the adoption of the double standard, and he believes that it is not possible for the commerce of the world much longer to disregard the value of silver as money.
"Do you believe the battle will be fought by the old parties, or by the Populists?"
"I think the political controversy will be fought down between the two great parties, as I do not believe that a permanent party will be built up by the Populists and I do believe that one of the old parties will take up the questions which are the cause of popular discontent."
"You were the father of a statehood bill for Utah in the senate?"
"Yes, I think the people can be trusted to take care of their own interests, and I sympathize with all people who want to exercise the rights of American citizenship. Local self-government is especially dear to all our people."

NEWS FROM THE PARK.
The Northland-Mayflower Settlement Will Help the Camp.
PARK CITY, May 1.—There were no bullion or ore shipments from here during the past week.
The heavy storms during the past week have made the roads almost impassable, and ore hauling was consequently delayed.
The building of the new Mackintosh sampler is progressing as rapidly as the unfavorable weather will permit. It is expected that the mill will be ready for the transaction of business in about two weeks.
The work of shoveling the snow from the Crescent tramway has been completed. The engines and ore cars are being overhauled and put in shape for active work, which is expected to be commenced during the coming week.
Ore hauling from the Daly mine to the Marac mill and from the Anchor mine to the Crescent sampler was commenced during the past week, but the heavy roads made it impossible to bring down any large quantities.
The Ontario mill will close down during the present week for the usual spring repairs and most of the mill will take a vacation until the mine is finished.
The Crescent mine on which considerable underground work has been done during the past winter, is said to be in first-class shape and it is expected that the output will be greater than during any previous year. The work of extending the mine, especially the Daly, Ontario and other valuable mines would have done more to convince the opponents of free coinage than all the arguments that could be used at a half dozen congresses.
The announcement of the settlement of the Mayflower-Northland controversy, an exclusive account of which appeared in yesterday's Herald, was received here with many expressions of satisfaction and pleasure. The settlement will undoubtedly have a beneficial effect on the camp, and the prospect of a profitable business will be opened up and developments of the most valuable ground in this district. The fight has been a stubborn and bitter one, and the settlement is a great relief to the public schools will be closed today and the pupils will be allowed to enjoy the May holiday.
Our worthy mayor, Dr. G. D. Gregor displayed an exuberance of spirits on Friday last that was somewhat unusual, and the citizens who witnessed the cause that a young son had made his appearance the night previous, and his honor was receiving the congratulations of the whole community.
The whole community and his deputies made a raid on Wednesday night and arrested the keepers of the houses of ill-fame. They were brought before Police Justice Lockwood yesterday and fined a considerable amount, making an increase in the treasury in the sum of \$400.
Champion Jim with his company will give a performance at the opera house on Wednesday night. The sale of reserved seats commenced yesterday morning, and judging from the number sold the house will be too small to accommodate the large throng of admirers who are anxious to welcome the champion.
The question of the removal of the county seat from Coalville to Park City is becoming an all-absorbing topic. The question is looked upon by all as a non-political one. Among its advocates and opponents are the representatives of all political parties. The inhabitants of Park City and vicinity are in favor of removal, while those from the other end of the county are opposed to it. As to the question of locality, there is very little argument, as both places are at extreme ends. The main question is whether the taxpayers can afford to have a new building erected, and if so, which is the best place to erect it? That the present structure is unfit and insecure there is not a question of doubt. It has been condemned by a grand jury, and has been an eyesore to many of our taxpayers for the past ten years. The sheriff is unable to confine any part of the county, for 40 cents a day, and the county has been obliged to take them to the Salt Lake penitentiary for safe keeping. Any money spent on the present building would be money wasted, and the amount has been expended during the past four years for repairs and it is as uninhabitable today as it was five years ago. A vault was put in four years ago at an expense of \$1,000, wherein to place the county records, and when it was completed it was found that it could not be used on account of dampness, and at present there is no safe place wherein to keep most of these valuable documents. If a fire should occur, these records would be destroyed before assistance could be rendered and this would entail a loss that could not be compensated. We in Park City believe that we are entitled to the distinction on account of population, resources and business. We have more than one-half of the population, we more than half of the taxes, and two-thirds of the business at the county seat comes from Park City. All concede that Summit county should have a building commensurate with its stand in the territory, and to which we could point with some degree of pride. If a commodious building could be erected here, which could be used on account of dampness, and at present there is no safe place wherein to keep most of these valuable documents.
